Feeling Nature

Nitrogen fertilizers

Our component for Nitrogen fertilizers
makes them:

- More efficient **100%**
- Cheaper **15%**

Dear Ladies and Gentlemen!

The TM Agri Dives product was developed by leading German experts, made in accordance with European technologies, and meeting the latest fertilizers' standards.

- **Contains active silicon**, magnesium, iron of chelated form; potassium, vanadium, lanthanum, selenium and other trace elements.
- **Adding only 5-20%** of our components to nitrogen fertilizers significantly changes their quality characteristics, lowering the cost, raising the profitability.

Using fertilizers with our component

- **Lowering** the fertilizer acidity .
- **Deacidifying** the soils, avoiding traditional methods .
- **Reducing** nitrogen disintegration during application, production and storage.
- **Improving** the efficiency of phosphate fertilizers .
- **Cutting down** the fertilizer cost by **5-25%** .
- **Reducing** the fertilizer application rate **by 30%** .
- **Reducing** clotting .
- **Reducing** explosion class .
- **Reducing** the content of nitrates and heavy metals in products .
- **Boosting** productivity.
- **Improving** seed germination uniformity .
- **Shortening** the crops' ripening period.
- **Removing** soil fatigue .
- **Alleviating** the impact of unfavorable weather conditions on the efficiency of fertilizers .
- **Reducing** plants' consumption of **water by 30%** .
- **Increasing** drought tolerance and plant resistance to other stress factors .
- **Enrichment** of the soil with the necessary macronutrients .
